DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to the guanidine compounds of formula (I) where X¹, X², X³, X⁴, X⁵, X⁶, X⁷ and X⁸ are all carbon.

Group II, claim(s) 1-3, drawn to the guanidine compounds of formula (I) not embraced by Group I.

Group III, claim(s) 4-9, drawn to the asymmetric nucleophilic addition reaction.

Group IV, claim(s) 10-13, drawn to the asymmetric Michael addition reaction.

Group V, claim(s) 14-17, drawn to asymmetric epoxidation reaction.

Group VI, claim(s) 18, drawn to the process of preparing an optically active compound of formula (9a) and (9b).

Group VII, claim(s) 19, drawn to the process of preparing an optically active compound by dissymmetric procedure.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions of Groups I and VI are drawn to structurally dissimilar compounds of formula I. They are made and used independently. One does not require the other for their use. If, say, the

dinaphth[2,1-c:1',2'-e]azepine of Group I, were anticipated, applicants would not acquiesce in the objection of any of the Groups II-VII there over or vice-versa and, thus, they are not linked to the same or corresponding special technical features.

The inventions I and III-VII are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful to prepare other fused azepanes and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants.

If any of Groups II-VII are elected further restriction to a particular core and/or election of species would be required by the examiner.

Tentative election of a single species within the elected group is further required.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
